Vmware

VMware (NYSE:VMW), the industry-leading virtualization software company, empowers organizations to innovate and thrive by streamlining IT operations. By virtualizing infrastructure—from the data center to the cloud to mobile devices— VMware enables IT to deliver services from any device, anytime, anywhere.

VMware is radically transforming IT with technologies that make your business more agile, efficient and profitable. A pioneer in virtualization and policy-driven automation, VMware simplifies IT complexity across the entire data center. We deliver value to more than 500,000 customers through virtualization software, professional services and a robust ecosystem of more than 55,000 partners that drives application interoperability and customer choice.

Our Shanghai office is located in the Yangpu District, near Fudan University. We've recruited the best and brightest from all over China, and are looking for motivated engineers to help build VMware's next-generation multi cloud platform. Want to work in a startup environment with the resources of an established company? Come join our team!

Cloud Provider Software BU

Our team is building various management portals for various VCPP products. We build our products with cutting-edge technologies and frameworks, and keep code as clean and easy maintainable as possible. We believe this ensures high work efficiency and deliverables with good quality. We also collaborate closely with PMs & Peer teams, through the full software development lifecycle, from design to test to release.

We are searching great Web Engineers to join us to continue our growth and success.
